

## **Title: How to Use the Gradient Map Tool in Clip Studio Paint**

Department: Digital Artists

Goal/Focus: Teach artists how to use the tools in the Clip Studio Paint application, also advertise the convenience of using the product.

Writer: Script writer for the Clip Studio Paint tutorial website

Row ID	Step/Scenario/Visual	Length of Time	Slide #	Audio Text	Additional Text
	Show title screen with Clip Studio Paint logo	0:07	1	Hi, welcome to this tutorial on how to use the Gradient Map tool in Clip Studio Paint.	CLIP STUDIO PAINT: How to Use the Gradient Map Tool.
	Show definition of Tonal Correction Layer on a slide	0:11	2	What is a 'tonal correction layer'? Tonal correction is an option in Clip Studio paint that allows you to modify a drawing's brightness, luminosity, saturation, hue, colour gradient, and more.	Correction Layers What is a 'tonal correction layer'? Tonal correction is an option in Clip Studio paint that allows you to modify a drawing's brightness, luminosity, saturation, hue, colour gradient, and more. A correction layer allows you to add a tonal correction effect to a layer, or multiple layers, without affecting the original layer(s).
	Show CSP UI and person flipping through various gradients on a drawing	0:06	3	The gradient map tool allows you to quickly add a colour palette to a drawing

	Show title page for topic	0:08	4	Applying a Gradient. In this section, we are going to apply a gradient to our drawing and adjust the colour balance using the sliders.	Applying a Gradient. In this section, we are going to apply a gradient to our drawing and adjust the colour balance using the sliders.
	Show CSP UI with a partially coloured drawing on it	0:03	5	We will be starting with a partially coloured drawing	
	Show CSP UI with a partially coloured drawing on it – user selects layer tab	0:06	6	Select the layer tab in the top bar,	Select the 'Layer' tab
	Show CSP UI with a partially coloured drawing on it – user selects layer dropdown	0:06	7	Or select the layer dropdown menu on the right side of the screen.	Select the 'Layer' dropdown menu
	Show CSP UI with a partially coloured drawing on it – user selects new correction layer	0:06	8	Select 'new correction layer'	Select 'New Correction Layer'
	Show CSP UI with a partially coloured drawing on it – user selects gradient map	0:03	9	Then select 'gradient map'	Select 'Gradient Map'
	Show CSP UI with a partially coloured drawing on it. – gradient map window is open	0:03	10	The gradient map window will then open.	The Gradient Map window will open

	Title slide with a carousel showing both chapters the lesson is split into on each slide	0:15	11	Now that we have the gradient map open, we will learn how to apply and modify gradients, then learn about modifying the layer mask and the correction layer.	LESSON CHAPTERS In this lesson, we are going to learn how to apply and modify gradients to a correction layer and then learn how to further customise the correction layer using the layer mask. Use the left and right arrows to move between cards to learn more.
	Carousel slide for 'APPLYING AND MODIFYING GRADIENTS' Show image of gradient changing a drawing		11		APPLYING AND MODIFYING GRADIENTS In this lesson, you will learn how to select, modify, save, and apply gradients using the gradient map tool.
	Carousel slide for 'LAYERS MASKS AND THE CORRECTION LAYER' Show image of layer masks		11		LAYER MASKS AND THE CORRECTION LAYER This chapter will detail how to use adjust the gradient map layer within the layers menu, including how
